

Incy wincy spider props: create your own theatre play

Print out the props below to create your own theatre play you can perform while you sing along.

For longer lasting props, laminate them and store them in a bag for next time.

The two spiders below paste back to back so you have a double-sided image. Put a hole through the tail end and thread some string through so the child can bounce the spider about. Print one double-sided spider for each child to play with while singing the song.

The sun, spider and rain cloud on the following page put blu-tac on the back. Place onto the scene of the water spout at the appropriate points during the song.
